## Personal Profile

I'm a front-end React developer with a strong focus on creating beautiful, responsive user interfaces. With 6 months of experience under my belt, I've gained expertise in building dynamic and interactive web applications using React, Redux, HTML, CSS, Bootstrap and JavaScript. I enjoy working collaboratively with cross-functional teams, communicating technical concepts to both technical and non-technical stakeholders, and delivering high-quality work in a fast-paced environment. I'm always eager to learn and stay up-to-date with the latest industry trends and best practices.

## Work Experience
